QUALITY POLICY

Preamble:

The automotive market is a global market, where competition is getting stronger. In this context, our Company/Group has chosen the Continuous Improvement and Total Quality as a privileged means for achieving the targets of growth and market presence, in accordance with the needs expressed by the international norms.

The development and success of our business is achieved by having the ability to meet and exceed the expectations of customers, shareholders and employees, making with efficiency, products of quality, in conditions of safety and environmental compliance.

The principles we will follow are:

- ◆ Development and enhancement of human resources through the involvement of staff at all levels, promoting the team working, empowerment and continuous training
- ◆ Continuous improvement in all activities
- ◆ Elimination of waste in all areas
- ◆ Prevention of errors, not correction
- ◆ Continuous improvement

The management is engaged to supply all resources and tools to assure the present Quality Policy, assures the involvement and motivation of all the people, monitors the effectiveness of company processes and in particular the Quality System in accordance with the ISO 9001 and Technical Specification IATF 16949

Our customers can choose: we must ensure that they choose our Company/Group
